

Mobilev 20 MT-3X1-TC Mini Crane

Referencia: 25MT 3x3 TC

Description

The 20 MT-3X1-TC is a mini all terrain crane with a variable wheelbase, ideal for all kinds of work inside and outside of a small building.

Its patented three-cylinder kinematics, developed by Mobilev Cranes, enables greater angular displacement of the shaft. With "hydraulic distribution with proportional control", the speeds can be adjusted from 0 to 100% from the standard wired remote control or the radio control (optional).

The "18° slewing ring" option without stabiliser is also available on this model. Therefore, the hook can be adjusted laterally without moving the mini crane off the ground. The 20 MT can also integrate the "electric winch" option located at the end of the telescope

All mini-cranes with the Mobilev seal include anti-roll mechanisms with alarms that assist operators in their work, so that they can operate with greater safety and guarantees against possible mistakes.

20 MT-3X1-TC mini crane accessories and equipment

- Hydraulic distribution with proportional control
- Hydraulic variable wheelbase

- Electric drive wheel controlled by variable speed drive
- Tiller with throttle and emergency reverse
- Automatic parking brake
- Anti-tip device
- Wired remote control, potentiometer and emergency stop
- Storage box for accessories
- Interchangeable traction batteries
- Integrated battery charger

Technical sheet

Model	20MT-3X1-TC
Brand	MOBILEV
Load capacity	2160 kg
