

Tennant T1B pedestrian battery- powered scrubber

Referencia: T1B

Description

Tennant T1B battery powered scrubber, safe and efficient cleaning

The T1B scrubber enables cleaning tasks to be carried out at any time of the day and also eliminates the problems of small corded scrubbers, providing safe and flexible cleaning. This machine is a multipurpose tool, thanks to its lithium ion batteries. These batteries last up to 20 times longer at higher frequency compared to conventional batteries, so you can switch

applications quickly.

The Tennant T1B battery-powered scrubber is highly compact and manoeuvrable, with excellent scrubbing performance and a noise level of just 68 dBA. It replaces traditional cleaning with bucket and mop and has extraordinary water recovery that reduces falls and accidents due to possible slips.

Its size is perfect for cleaning up spills in hallways, foyers and cafeterias at any time of the day.

Tennant T1B pedestrian battery-powered scrubber benefits

- Risk-free thanks to the elimination of cables from the scrubber.
- The manoeuvrable design of the T1B scrubber enables cleaning in small and congested areas forwards and backwards.
- The optional fast-charging lithium-ion battery ensures high traffic cleaning several times a day.
- This scrubber is perfect for cleaning hallways, entrances and foyers thanks to its 38 cm cleaning width.
- Cleaning is quiet thanks to a noise level of 68 dBA. Optional Li-ion battery lasts up to 20 times longer in high frequency, fast charge applications.
