

Tennant T300 pedestrian scrub

Referencia: T300

Description

Tennant T300 scrubber and dryer: innovation and high performance

The T300 pedestrian scrubber is the best solution for your specific application with unmatched versatility in the industry.

The Tennant 300, can carry out cleaning tasks worry-free thanks to the squeegee system and battery power.

This scrubber and dryer can be fitted with Tennant's innovative ec-H2O NanoClean™ scrubbing technologies, which can reduce water and detergent consumption. This cleaning machine is the

ideal solution for specific applications thanks to its great versatility.

It has multiple head options, so that it can be seamlessly adapted to different cleaning environments. The Zone Settings™ cleaning settings are programmable for specific conditions.

Tennant T300 scrubber and dryer benefits

- Safe handling of the Tennant 300 is assured thanks to the machine's on-board instructions, thus achieving better results, reducing cleaning costs and simplifying operator training.
- It is perfect for educational, healthcare and office cleaning environments thanks to Quiet-Mode™, reducing noise levels for uninterrupted cleaning throughout the day.
- Its innovative squeegee design ensures dirt and water are removed from the floor, reducing possible workplace accidents as well as easily installation of the squeegee's replacement blades.
- The yellow touch points simplify training and preventive maintenance, thus preventing possible breakdowns.
- Filling is simplified and accelerated, reducing the possibility of spillage, thanks to its easy-fill port.
- Batteries are charged safely with the cover closed, thanks to the on-board charger fan opening and integrated orifices.
- The new electronics on this scrubber make it possible to clean finished concrete surfaces daily and to work with abrasive pads and brushes.
- Zone Settings™ enables supervisors to easily set different cleaning configurations for different applications.
