

Tennant T17 battery-powered, ride-on scrubber

Referencia: T17

Description

Tennant T17, heavy-duty cordless scrubber/dryer

The T17 enables operators to quickly access settings without taking their hands off the wheel thanks to the Touch-n-Go™ control module with 1-Step™ start button. It is also available with optional Pro-Panel™ technology.

The operation of this scrubber is simple with brake and acceleration pedals similar to those of a car. It has an access step to the collection tank that enables easy access to it for inspection and

cleaning.

The revolutionary water trap on this scrubber helps the operator to reduce potential spills and dripping by providing unrestricted airflow while also capturing moisture left in the collection hose when shutting down.

It has a rotating squeegee that provides excellent water collection to reduce the risk of possible falls and slips.

Its large-capacity batteries increase productivity as they prolong the machine's operation.

Tennant T17 scrubber features and benefits

- High performance on battery power with the innovative T17 industrial ride-on scrubber, offering customised solutions to meet customers' requirements.
- Clean difficult floors with the optional pressure washer that features a 2500 psi spout. Also, the optional connecting hose quickly collects various light waste such as shrink containers.
- The Touch-n-Go™ control panel and its 1-Step™ start button increase ease of use and therefore productivity.
- The optional Pro-Panel™ technology transforms cleaning operations, as various cleaning settings can be integrated: a rear-vision camera and video on demand from a truly intuitive and highly visible touch screen.
- Tennant's innovative ec-H2O™* technology can clean up to three times more with a single tank of water.
