

Tennant 800 industrial ride-on sweeper

Referencia: 800

Description

Tennant 800, industrial sweeper with unprecedented performance

The Tennant 800 is the largest and most powerful industrial sweeper in its range. It has been designed with the clear objective of sweeping large concentrations of industrial waste, gravel, pellets and glass in indoor and outdoor industrial areas.

The durable design of the Tennant 800 sweeper provides consistent performance with a flex-resistant steel rear wheel mount, a solid steel T-bar superstructure and optional heavy-duty bumpers.

This machine includes four very efficient filters that capture particles and dust in suspension practically in its entirety. It also has a timed indicator light and shaker mechanism that enables the operator to resolve occasional clogs in the filter.

The Model 800 enables the operator to clean comfortably with a deluxe suspension seat and an

adjustable steering wheel with power steering.

Tennant 800 features and benefits

The Tennant 800 industrial ride-on sweeper has been designed to trap everything from heavy debris to cement dust:

- The machine's cleaning width, operator comfort and large-capacity hopper increase cleaning productivity.
- Very tough in complex work environments thanks to reinforced steel construction and high performance dust containment.
- Spacious cab and easy access to sweeper controls provide greater operator comfort. The cab offers a comfortable and controlled environment. Its deluxe suspension seat, adjustable steering wheel and power steering also contribute positively to operator comfort.
- The investment in the Tennant 800 is protected as the machine has rear bumpers to minimise damage.
- The stainless steel hopper bottom prolongs the life of the machine when used in harsh environments.
- The sweeping speed can be adjusted to the type of residue with the II Speed™ technology.
- Productivity is increased by decreasing waste disposal frequency using the large capacity multilevel hopper (30 ft/9 m).
