

Tennant M20 integrated ride-on sweeper/scrubber

Referencia: M20

Description

The M20 sweeper/scrubber features a Touch-n-Go™ control module with a 1-Step™ start button that makes settings easy to access without removing the hands from the steering wheel and a large-capacity, multi-level hydraulic rear hopper (3.9 ft³/110 L | 390 lb/177 kg) that increases cleaning productivity by eliminating the need to manually handle debris.

Due to its innovatively designed and easy access to the visibility of on-board diagnostics and maintenance, costs and downtime are minimised.

It features the Dura-Track™ parabolic cloth with SmartRelease™ that provides excellent water pick-up reducing maintenance and spare parts as a result of cloth damage.

The forward position of the cab and spacious operator compartment provide outstanding visibility, safety and ergonomics to protect the operator, the machine and the facilities.

The M20 has easy-to-identify yellow maintenance contact points that save time and money on routine maintenance tasks. A protection canopy can also be added that prevents the operator from being hit by flying objects.

The high pressure wash easily blast cleans hard-to-reach areas and the safety warning light guarantees the machine's visibility during use.

Tennant M20 Integrated sweeper/scrubber features and benefits

With features designed to ensure maximum efficiency and excellent performance results, the Tennant M20 integrated sweeper/scrubber increases productivity when cleaning:

- The sweeper/scrubber effectively cleans wet and dry surfaces in just one pass thanks to the integrated FloorSmart® cleaning system technology.
- The MaxPro²™ hydraulic technology achieves uniform cleaning results.
- Cleaning time is tripled on a single water tank thanks to Tennant's innovative ec-H₂O™ technology, which uses up to 70% less water.
- Excellent operator visibility with the front cab design, steering wheel controls and a wide field of vision.
- Simple maintenance and use experience for the operator with intuitive controls and easy to identify yellow contact points.
