

Tennant M17 cordless ride-on sweeper/scrubber

Referencia: M17

Description

The M17 sweeper/scrubber features a Touch-n-Go™ control module with 1-Step™ start button that makes it easy to access settings without taking the hands off the wheel. It is also available with optional Pro-Panel™ technology.

Thanks to its high discharge, manual waste handling is eliminated and larger waste items can be placed in the hopper for subsequent disposal. Also, the access step to the collection tank can be accessed easily for cleaning and inspection.

It has a revolutionary siphon system that helps to reduce dripping and spills by providing an unrestricted flow rate and capturing the water that remains in the collection hose by turning the suction off.

The rotating squeegee provides excellent water pick-up to help reduce the risk of falls and slips.

Different high-capacity battery options extend operating time for greater productivity.

Tennant M17 ride-on sweeper/scrubber features and benefits

With features designed to ensure maximum efficiency and provide excellent performance results, the Tennant M17 cordless sweeper/scrubber increases productivity.

- Choice of two sweeping system options: direct or long reach for longer pallet particles up to 55 cm and finer debris such as sand and dust or Double Force Sweep (DFS™) for heavier debris and granules and pallet particles less than 15 cm.
- The optional pressure washer features a 2500 psi spout for cleaning difficult floors, while the optional connecting hose quickly collects various types of debris.
- With Tennant's innovative Pro-Panel™ technology, the brand revolutionises cleaning tasks, integrating various settings, rear-vision camera and videos into a highly-intuitive and visual touch screen.
- The Touch-n-Go™ control panel and 1-Step™ start button increase ease of use and productivity.
