

# Front Telescopic Handler TH TH 5.5 24

Referencia: TH 5.5 24

## Description

---

The Front Telescopic Handler Magni TH 5,5.24 is a high-performance load handling machine that combines power, versatility and precision in an exceptional design. This telehandler is ideal for meeting a wide range of challenges in industries such as construction, agriculture and logistics. With a maximum load capacity of 5,500 kg (or 5.5 tons) and a maximum lift height of 24 meters, the TH 5.5.24 stands out for its ability to handle heavy loads and access considerable heights. Its telescopic boom provides unmatched versatility, making it an ideal choice for work at height, such as lifting materials on construction projects or loading goods onto high racks in high-bay warehouses.

The performance of this machine is impressive. Equipped with a powerful and efficient engine, the Front Telescopic Handler Magni offers fast response and maneuverability, making it easy to perform tasks efficiently and accurately. Its robust and durable design ensures consistent performance even in harsh working conditions.

Safety is a key priority in the design of Magni. The TH 5.5.24 has advanced safety features, such as effective braking systems, intuitive controls and a spacious, ergonomic cab that provides optimal visibility for the operator. This ensures protection of both the operator and the load being handled, even in challenging working environments.

Durability is a hallmark of Magni equipment, and the TH 5.5.24 is no exception. Its robust

construction and the use of high-quality materials ensure a long service life and reliable performance in demanding working conditions.

Ease of maintenance has also been taken into account in the design of this machine. Access to key components has been simplified, reducing downtime and minimizing service costs over time.

In summary, the Magni TH 5.5.24 Telescopic Front Handler is an exceptional choice for those looking for power, versatility and safety in their load handling and overhead operations. Its impressive load capacity, substantial lift height and reliable design make it a solid investment for improving efficiency and productivity in a variety of industrial and construction environments. Trust Magni to take your operations to the next level and optimize your jobsite with this exceptional machine.

## Technical sheet

Engine type	Deutz TCD 3,6 L4 Stage V
Length	6960 mm
Width	2490 mm
Weight	17000 kg
Load capacity	5500 kg
Height Elevation	24 m
Maximum range	19.1 m
Motor Power (KW)	100 kW (136 hp) at 2,200 rpm
Maximum elevation height	23.9 m
Stabilizers	Pivoting
Load capacity at maximum height	1500 kg
Ground clearance	420 mm
No. of gears	44959
Hydraulic system	350 bar (Load Sensing)
Travel speed	40 km/h
Climate control as standard	Yes
Automatic recognition of accessories	Yes
