

2500 kg MOBILEV 25MT-3X3-TC-V2 Mini Crane

Referencia: 25MT 3X3 TC V2

Description

The 25MT 3X3 TC is a mini all terrain crane with a large hydraulic double telescopic boom mounted on a 40° turret (optional).

It uses a three-cylinder kinematics, developed by Mobilev Cranes, which enables a greater angular displacement of the shaft. With drive wheels at the front, it can move "like a crab" (along its transverse axis). All speeds can be adjusted from 0 to 100% from the standard wired remote control or the radio control (optional).

Lastly, the 25MT 3X3 TT can also include the "hydraulic winch" option. Perfectly fitted in the mini crane, the cable passes through the inside of the shaft for optimal safety, an innovation from Mobilev Cranes.

Mini crane accessories and equipment:

- Three NSF hydraulically driven wheels (*).

- DE wheels hydraulically orientable to 90°.
- Hydraulically adjustable ground clearance.
- Selector 3X3, 3X2, "Crab".
- Hydraulic steering assist.
- Anti-tip device.
- Automatic hydraulic braking.
- Automatic hydraulic parking brake.
- Integrated electronic battery charger 220V~.
- Wired remote control and potentiometer to adjust the speeds of all axes.

Technical sheet

Model	25MT-3X3-TC-V2
Brand	MOBILEV
Load capacity	2500 kg
Ordering	2500
