

Logitrans RR coil turner 500 kg

Referencia: RR

Description

The multifunction turner is an efficient and flexible tool with a handling capacity of up to 500 kg. In terms of coil diameters, it is designed to effectively handle coil diameters from Ø120 mm to Ø1270 mm, taking into account that the gripper arms can be opened 1300 mm).

All types of operations can be carried out with vertical coils located on the ground or horizontal off the ground regardless of whether they are soft, delicate or hard. This model is available with articulated legs.

Another key feature of the turner is the safety it offers, as the gripping arms that hold the coil cannot be opened by mistake and can only be released when placed on the ground or on a pallet. The rubber-coated pads that accompany the arms achieve maximum friction to ensure grip.

Additional information about the Logitrans RR coil turner:

- Maintenance costs are very low thanks to its robust structure that prolongs its useful life.
- It has two speeds for clamping and lifting the coils.
- The tilt degree can be adjusted every 90°.
- Error, position and rotation angle messages are displayed on a large touch screen that is very simple and intuitive to use.
