

Logitrans LOGIFLEX MS 1000 kg manual stacker with articulated legs

Referencia: Logiflex MS

Description

The stacker facilitates optimal goods handling thanks to the pin-axle board, to which different implements can be fitted to adapt to the load type. The stacker design is compact and robust, reducing maintenance costs and prolonging its useful life.
It is recommended for tight workplaces as its design combines great manoeuvrability with use of space.
Logitrans' extensive testing programme guarantees the highest quality on the machine as well as compliance with the highest health and safety standards.

Further information on the Logitrans LOGIFLEX MS manual

stacker

- Great manoeuvrability thanks to its adjustable forks (optional).
- Manual change between normal/fast lift and power steering.
- Protected chains and foot protectors.
- Ergonomic tiller.
