

## Logitrans Self Mini electric stacker 1000 kg

Referencia: Self Mini

### Description

---

The stacker facilitates optimal goods handling thanks to the pin-axle board, to which different implements can be fitted to adapt to the load type. The stacker design is compact and robust, reducing maintenance costs and prolonging its useful life.

It is recommended for tight workplaces as its design combines great manoeuvrability with use of space. Its reduced height also facilitates visibility for the operator.

Logitrans's extensive testing programme guarantees the highest quality in the machine as well as compliance with the highest health and safety standards in terms of occupational hazards.

**Further information about the Logitrans Self Mini electric stacker:**

- With AC Technology (Curtis controller).
- Great manoeuvrability thanks to its adjustable forks (optional).
- Low power required to start, ergonomic tiller and rounded corners.
- Protected chains and foot protectors.
