

Logitrans Logitilt LTS tilting pallet jack with articulated legs 1000 kg

Referencia: Logitilt LTS

Description

These types of lifts offer the highest quality and safety through the Logitrans testing programme and its close collaboration with occupational hazard experts. Its protection for the operator includes an ergonomic tiller that facilitates grip without tension. The inclination of up to 90° avoids forced movements and does not require the user to bend to reach objects at the bottom of the case.

An extensive testing programme and collaboration with health and safety experts guarantee the high quality of this pallet jack model.

Further information about the Logitrans Logitilt LTS electric pallet jack:

- Adjustable width between articulated legs.
- The tilt can be activated by remote control.
- Inclination can be adjusted during filling and emptying or to always stop at the same angle.
- Foot guards and parking brake.
- Robust machine with low maintenance costs that prolong its useful life.
