

## Logitrans Mover lithium electric pallet jack 1500 kg

Referencia: Mover

## Description

---

The battery is one of the star components of the model thanks to its 4.5 kg weight and its small size. With these features, you will enjoy an extremely compact model. The battery can be replaced in two seconds and charges in as little as 2.5 hours with a long run time between charges. Lithium batteries have a high number of charge cycles.

This type of pallet jack offers the highest quality and safety through the Logitrans testing programme and its close collaboration with occupational hazard experts. It is designed to improve operators' working conditions in terms of ergonomics and safety. The ergonomic tiller has soft grip surfaces and a PIN code panel integrated into the LCD screen ensures easy control and operation.

## Further information about the Logitrans Mover electric pallet jack:

- In terms of performance, it offers electric lifting and lowering, a "tortoise" speed mode and an LCD screen with all the information necessary to get the best use of it.

- In terms of safety, it has an emergency button, horn, foot protection, stability wheels and input rollers.
- The battery change takes two seconds and it has a fast charge (2.5 hours).
- High number of charge cycles.
