

Logitrans Panther Silent manual pallet jack 2000 kg

Referencia: Panther Silent

Description

This type of pallet jack is tailored to the needs of operators in supermarkets or shops who want to move objects or handle pallets without generating background noise for customers who are shopping. This advantage also applies when using the pallet jack in buildings with shared spaces between shops and homes where noise reduction is very important.

The wheels of the Panther Silent work easily outdoors where there may be small chips, stones or even snow without any of these elements sticking to the wheels or blocking them.

Further information about the Logitrans Panther Silent manual pallet jack:

- Great manoeuvrability indoors and outdoors.
- Very short length behind the forks
- Low pallet jack weight and tight turning angle

- Its special rubber wheels have been tested to 60 dBA with minimal friction from all moving components.
- Robust machine with low maintenance costs that prolong its useful life.
- Adjustable fork height.
