

## Logitrans WSP 2200 pallet jack with scale 2200 kg

Referencia: WSP 2200

### Description

---

Most pallet jacks are limited to transport, so with certain goods it can be very laborious to carry out a weighing using another machine. The WSP 2200 solves this problem by dramatically reducing work time and significantly increasing operator productivity.

This pallet jack is especially accurate and ideal for weighing in storage areas or inspecting incoming and outgoing goods. The precision is supported by a system that has four weight cells and a robust display with the basic functions. The display offers a quick and simple reading of the weight from the centre of the pallet jack.

These types of lifts offer the highest quality and safety through the Logitrans testing programme and its close collaboration with occupational hazard experts.

### Further information about the Logitrans WSP 2200 pallet jack:

- Simple and logical settings display.

- Valve controlled lowering function and high pressure relief valve to prevent overweight.
- Anti-drip hydraulic system.
- TARE function (net and gross weight).
- Piece counting and zeroing.
- Various weights.
- Four strong weighing cells, IP68.
- Highly reliable weighing cells: 99.95%.
- Graduation: 1.0 kg.
- Backlit display with clear digits (30 mm).
- Battery indicator.
- Up to 250 hours of operation per recharge.
- Reduced length behind the forks.
- Closed turning angle.

## Technical sheet
