

1000 kg Logitrans Logitilt LTI stainless tilting electric pallet jack

Referencia: Logitilt LTI

Description

The stainless steel guarantees that this pallet jack can be used in workplaces that require maximum hygiene in contact with the goods handled. The Logitilt LTI is therefore very useful when transporting meat, fish or medicines.

Its design is comfortable and ergonomic, enabling the operator to manipulate boxes and containers with no need to bend. The forks can be tilted 90° and the tilt degree can be adjusted so that the pallet jack always stops at the same angle.

These types of lifts offer the highest quality and safety through the Logitrans testing programme and its close collaboration with occupational hazard experts.

Further information on the Logitrans Logitilt LTI tilt electric pallet jack:

- Minimises the risk of bacterial attacks

- Developed in environments with stringent hygiene demands
- Closed forks
- Easy cleaning
- Few points where bacteria can accumulate
- IP44
- AISI 316L acid-resistant steel fork chassis (no rust is formed in case of scratches)
- Robust structure
- Long shelf life
- Low maintenance costs - no relays or wearing parts
