

Logitrans Panther Partial Stainless manual pallet jack 2000 kg

Referencia: Panther Inox

Description

The Panther Inox model is very useful for moving meat, fish or medicines and in general for any sector that must be stringent on surfaces in direct contact with the products handled. The chassis is acid resistant and the tiller and lifting unit (wheel support, axles and push plate) are made of stainless steel. Also, the pushrod has a plastic polymer coating and the pump is chrome plated.

These types of lifts offer the highest quality and safety through the Logitrans testing programme and its close collaboration with occupational hazard experts. Its endurance has been tested with up to 46,000 lifts.

This pallet jack model is respectful to the environment and delicately handles pallets and product movements. It has rounded corners and has been carefully designed to improve working conditions for operators in terms of ergonomics and safety.

Further information about the Logitrans Panther Inox electric pallet jack:

- Minimises the risk of bacterial attacks
- Developed in environments with stringent hygiene demands
- Closed forks
- Easy cleaning
- Robust structure
- Acid-resistant steel AISI 316L for the chassis (no rust is formed if it is scratched), AISI 304 for all other steel components
- Long shelf life
- Low maintenance costs
