

# EMERGENCY STOP, CONTACTOR FOR SCISSORS AND ARTICULATED JOINTS

Referencia: 1019247

## Description

---

The purpose of the emergency stop button is to stop the machinery quickly when there is a risk of injury or when it is necessary to stop the work being performed in real time. According to regulations, every machine must have an emergency stop button or mushroom, so it is an element that must be in perfect condition to avoid risks.
