

BATTERY CHARGER 48V 50A 110V 48V 50A 110V

Referencia: 1019285

Description

An essential element if we do not want a machine to run out of battery just at the moment when we have the highest workload. A good battery charger extends the life of the battery as it does not force the charge and stabilizes it by not subjecting it to overheating or an unfavorable charging curve.

Technical sheet

Compatible with:

2440316710, NG3 48V 40A 115V
