

## SC1.0 compact ride-on stacker

Referencia: SC1.0

## Description

---

The Hyster SC1.0 pedestrian stacker is designed to meet all types of warehouse applications with a lighter work level.

Its butterfly-shaped tiller controls offer an effective response when controlling travel direction, speed and braking. They enable a smooth start and controlled acceleration and braking.

## Hyster SC1.0 compact stacker features

- This stacker has a battery discharge indicator (Red - Amber - Green status).
- The welded fork structure makes them highly resistant to torsion and heavy loads.
- Compact chassis design that improves accessibility.
- Anti-kickback system as standard.
- This SC1.0 compact stacker features double stabilisation to maximise stability when turning

and has single load wheels.

- Its ergonomic tiller head is designed to offer maximum operator comfort with ergonomic controls that reduce driver fatigue.
- The SC1.0 compact stacker has adjustable throughput values so that it can adapt to specific operating conditions.
- The SC1.0 stacker features an adjustable very-slow-speed feature for manoeuvring in high density areas and a tiller arm in upright or lowered position.
- This SC1.0 compact stacker has a 10A HF charger on board for on-site recharging and its battery is optimised to guarantee maximum uptime in all applications. These batteries are lead acid sealed and are maintenance free.

## Technical sheet

---

Model	SC1.0
Engine type	Electric
Lift Height (Industry)	1510 mm
Country	SPAIN
Battery Capacity	24 / 54hV/Ah
Load capacity	1000 kg
Ordering	1000
