Description

This cleaner has been tested and improved over the years, adapting it for all types of uses. Its main characteristics are

Fast evaporation, leaves no residue, high efficiency, does not damage ozone,

It is especially recommended for the rapid removal of dirt, oil and grease residues from metal surfaces, especially disc brakes, drums, brake calipers, brake pads and clutch parts. Highly recommended in mechanical workshops, industry, heavy machinery, transport, motorcycles and bicycles. In general in any application that demands a quick degreasing on metallic surfaces. It is a highly effective cleaner free of chlorinated solvents and CFC. It offers great convenience of use, high spray pressure, does not stain, evaporates quickly"
