

copy of AEROSOL DIELECTRICO

Referencia: 2000193-12

45 €

Description

"It is a solvent of high purity and high dielectric constant. Very effective in the removal of oil and grease residues on metallic surfaces. It is recommended in the cleaning of: Electric motors, capacitors and coils. Generators and starting mechanisms. Elevator shafts.

Transport, dry cleaning under the hood without rinsing. Cleaning of printed circuits. Its main characteristics are: Zero residue, Fast drying, Dielectric strength 20KV, Ozone friendly "
